## THE LABOIKO PROJECT

Thesis

The Laboiko is an agritouristic unit consists of four laboratories, two hotels and an info point. In the laboratories the guests have the opportunity to learn traditional recipes, to help make them and buy products to take back with them. In the guestrooms a part of sleeping, one can also learn the way of life of the villagers. The info point is the central square of the village where the guests can get information about the unit and the history of the surroundings.
